

Seminar: Inhibition in the central nervous system

Theme: Global inhibitory cascades in the CNS

The Inhibition Gordon Research Seminar and Conference are an international seminar and conference covering theoretical, computational and experimental aspects of inhibition from micro to macro scales!

5-6th of July 2025
Sunday River, Maine, US

Topics:

Subcortical GABAergic neurons
Modulatory impacts on inhibition
Computational Insights into inhibition

More Information & Application:

**Do you want to present
your research at an
international conference?**

We are looking for speakers & discussion leaders!!

6-11th of July Associated
Conference on Inhibition:

Discuss potential financial support?
contact Nicole: n.vissers@ucl.ac.uk

Organizers: Wricha Mishra & Nicole Vissers
